

# Early Achievers Participation

Progress on Implementing a Quality Rating Improvement  
System in WA State

October 31, 2015

# Total Participation by Provider Type

Across all provider types, participation is 68% of the RTT-ELC target

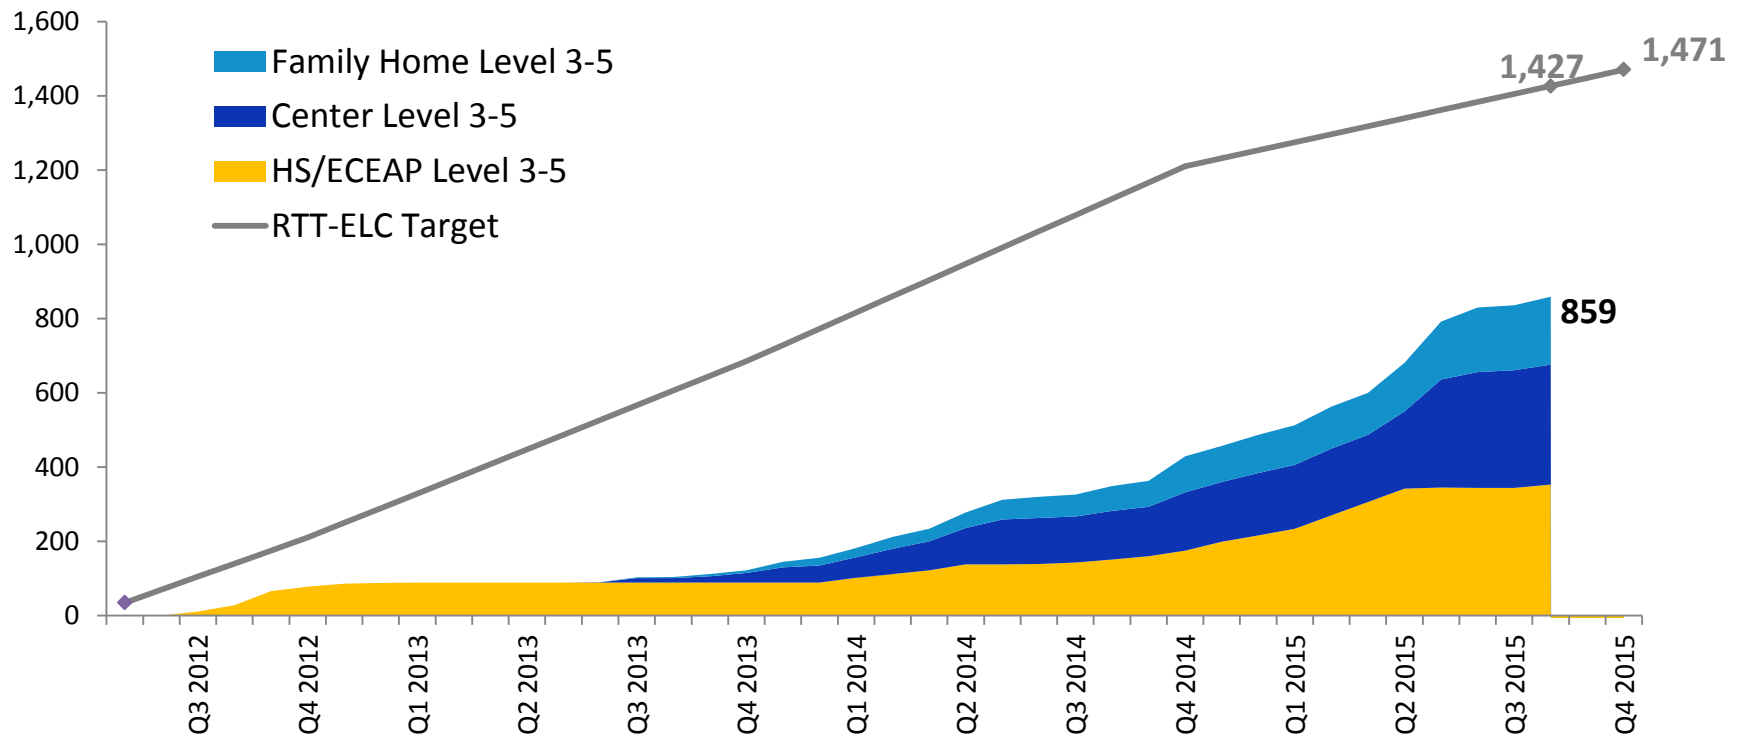

Providers who have exited the system are excluded from this analysis so these numbers are lower than original registrations. As of November 2014, system upgrades have made it possible for HS/ECEAP data to be fully integrated with the licensed provider base. EA reporting, including time/series HS/ECEAP counts, now utilize this integrated dataset.

Data as of: October 31, 2015

# Level 3-5 Sites by Provider Type

Level 3-5 participation in EA is 60% of the RTT-ELC target

Providers who have exited the system are excluded from this analysis so these numbers are lower than original participation and rating counts. As of November 2014, system upgrades have made it possible for HS/ECEAP data to be fully integrated with the licensed provider base. EA reporting, including time/series HS/ECEAP counts, now utilize this integrated dataset.

Data as of: October 31, 2015

# Participation by Licensed Providers

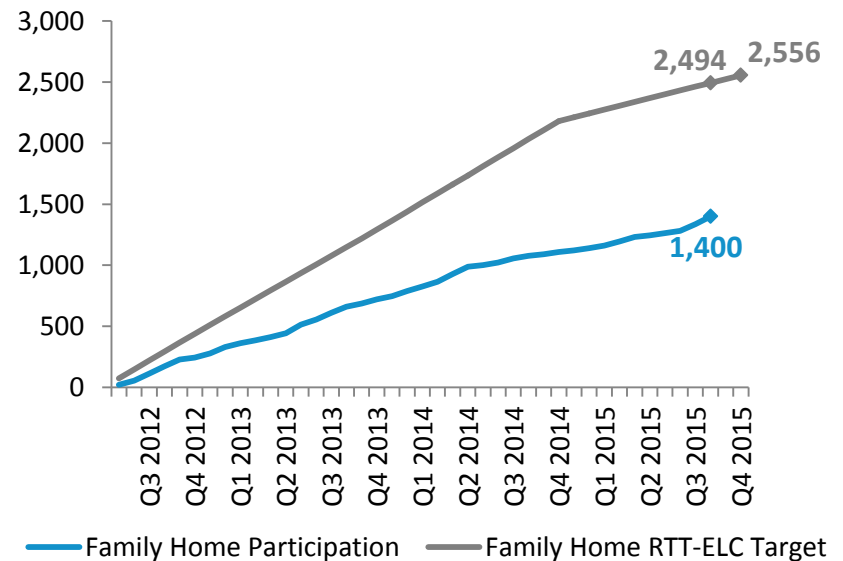

Centers are above target while Family Homes are below\*

- 2,303 licensed providers (Centers and Family Homes) are participating in Early Achievers as of October 2015, or 68% of the RTT Target of 3,407 licensed providers.

## Center Participation

## Family Home Participation

\*RTT targets are more ambitious for family homes than originally intended. If we factor in the 29% decrease in the family home provider base to the target calculation, the current RTT-ELC Family Home Participation Target would be 1,778 (378 below target, 79% of target). Providers who have exited the system are excluded from this analysis so these numbers are lower than original registrations.

Data as of: October 31, 2015

# Participation by HS/ECEAP Providers

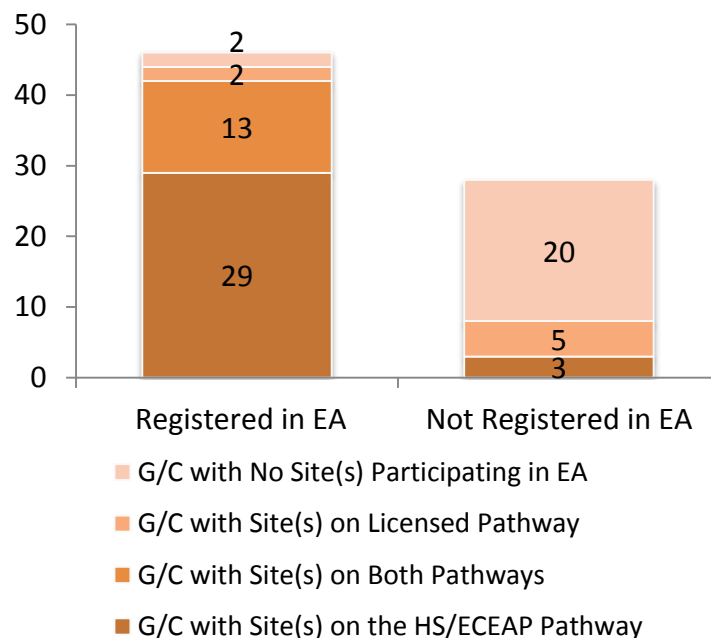

HS/ECEAP site participation is currently below RTT-ELC targets

- Of the 74 Head Start & ECEAP Grantees/Contractors in Washington 46, or 62%, have completed the Early Achievers (EA) Registration.

Provider Participation

Grantee/Contractor (G/C) EA Registration

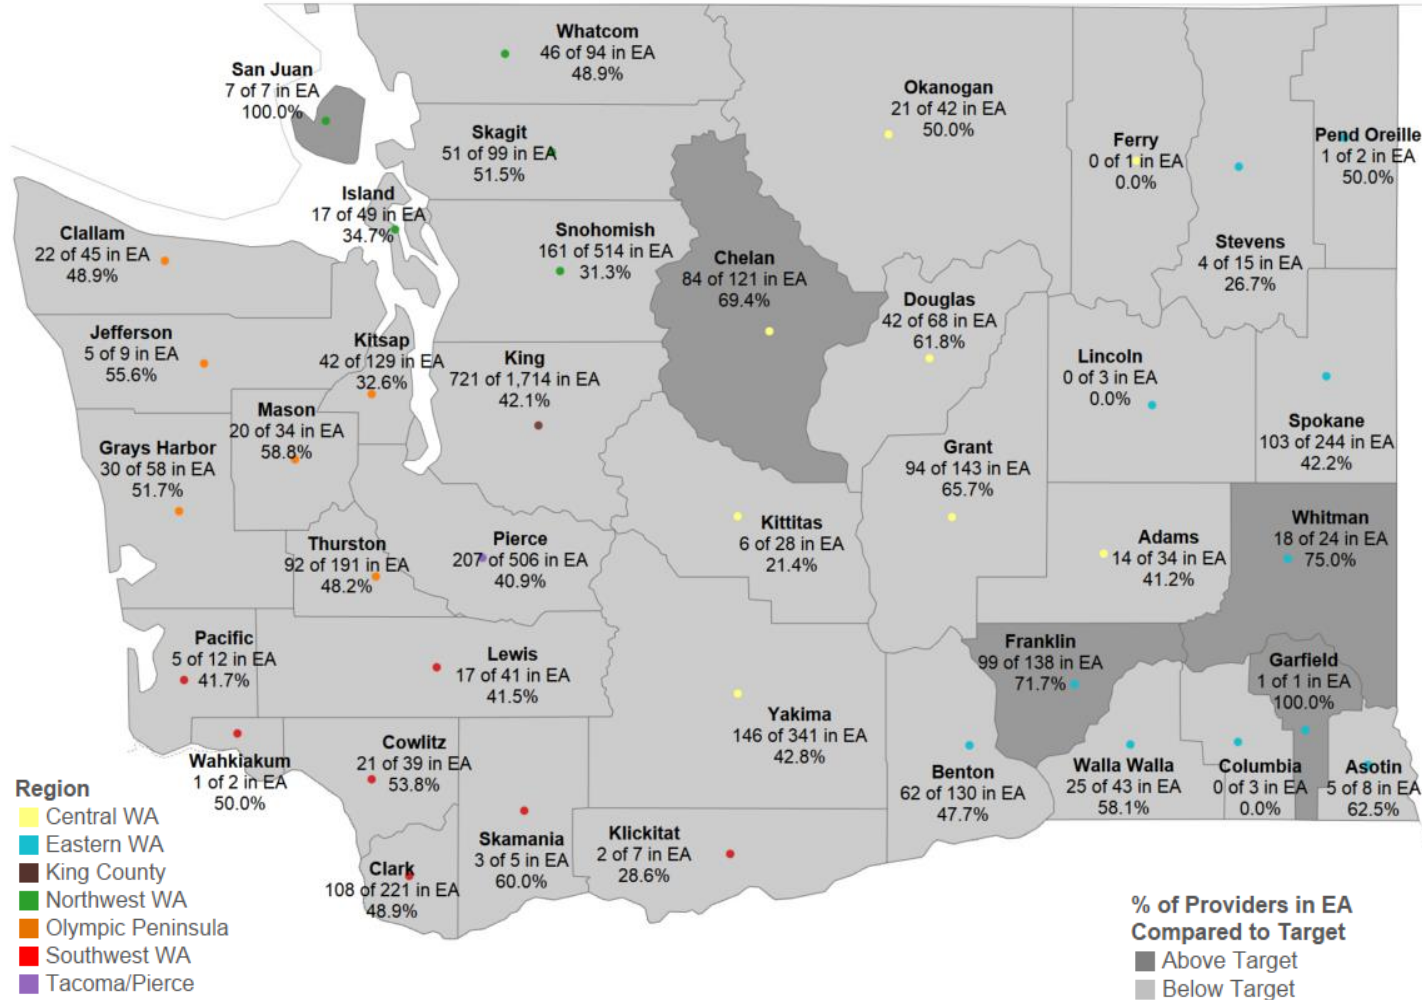

Participation data takes into account those providers who have exited the system, so these numbers are lower than original registrations. As of November 2014, system upgrades have made it possible for HS/ECEAP data to be fully integrated with the licensed provider base. EA reporting, including time/series HS/ECEAP counts, now utilize this integrated dataset. Grantee /Contractor participation is not compared to targets since targets were not formulated at the grantee level for the RTT-ELC project. G/C are only included in the statewide base if they have at least one active site in the current school year.

# Licensed Participation by County and Region

Participation is falling behind target for many large counties

- WA State has 2,303 licensed providers in Early Achievers (45% of licensed providers in the state), 21% below the 66% statewide participation target.
- Early Achievers participation is falling behind the statewide target of 66% for some of the most populated counties in the state: King, Pierce, Yakima, Spokane, and Clark.

\* RTT Targets are statewide and not adjusted for the staggered rollout of Early Achievers by region; as a result, county-level participation rates should not be viewed as a measure of performance against RTT statewide participation targets at this time. Providers who have exited the system are excluded from this analysis so these numbers are lower than original registrations.

Data as of: October 31, 2015

# Level 3-5 Licensed Ratings

## Ratings are falling short of RTT-ELC targets

- 506 licensed providers have received a quality rating of 3-5 through October 2015.
- This compares to a RTT target of 935 (54% of target).

Providers who have exited the system are excluded from this analysis so these numbers are lower than original rating counts.
